CAREER SUMMARY:

Front-End Developer with 2 year of experience , i develop websites and web applications using HTML, CSS and JavaScript. Experienced with mobile-first and responsive web design, understanding of JavaScript frameworks like react , Highly skilled in communication, collaboration.

WORK EXPERIENCE:

Wuilt
www.wuilt.com

Front-End Developer | 9 January, 2023 - 8 August, 2024

- add new features to wuilt builder like (social media links - border - file upload - date picker - date and time)
- custom code feature that allow the customer to write his own code in his own website this feature for advanced users that knows how to write code
- build widget tool that allow the customer to add his own social links account to that widget you can check it out here
- Fix existing bugs and refactor old code and extend our design system components

B7r Store - منصة بحر
www.b7r.store

Front-End Developer | 21 December, 2021 - 10 October, 2022

- helped the team to add some feature in the dashboard like upsell feature , abandon reminder cart, help-center feature to allow the customer to send their complaints and suggested features to our dashboard and chat application to connect admin dashboard with the customer dashbaord in this chat app i used graphql and apollo client to query and send the messages , i also built the home ui for our dashboard
- for our theme web app i created all the ui components styles such as navbar, footers, testimonials, countdown, newsletters , banners, sliders, multi columns, divider, featured product , all the product cards and product collections... etc.

PERSONAL PROJECTS:

Wuilt Clone | Next.js, Typescript, firebase,Tailwindcss | github   Dec 2022
- it's a website builder similar to shopify and wordpress and it's fully customizable
- you can create your own website on my project without writing any line of code and you can add new sections to the website like (service , about , testiomnials , pricing , etc..) or delete it.
- change the section background color or add image to the background, and change any image in the website by uploading new image , you can also crop the image to view certain parts
